

Iyad Shobaki  
FALL 2018\_Microsoft SQL Server Database (CPD222)  
Professor Shanda-lyn Yaeger  
View in SQL Server, Week 9  
10/24/2018

1. Script to create view called StoreSales\_vw in the Pubs database that shows the store name from all stores in California that match this criteria in the sales table:

- sales with quantities greater than 20
- payterms are equal to 'Net 30' or 'Net 60'

```
create view StoreSales_vw
as
select s.stor_name from stores s
inner join sales as sa
on s.stor_id = sa.stor_id
where state = 'CA' and qty > 20 and (payterms = 'Net 30' or payterms = 'Net 60')
```

2. SELECT query on the view

```
select * from StoreSales_vw
```
