- Select the unique author id as ssn, the lastname and firstname separated by a comma (smith, joe) as Fullname from the authors table joined on the titleauthor table where the royaltyper is less than 50. Order the query by the fullname.

Q)

```
SELECT DISTINCT a.au_id AS "SSN", a.au_lname + ', ' + a.au_fname AS  
"Full Name"  
FROM authors AS a  
inner join titleauthor AS t  
ON a.au_id = t.au_id  
WHERE t.royaltyper < 50  
ORDER BY a.au_lname + ', ' + a.au_fname
```

The screenshot shows a SQL query window with the following text:

```
SELECT DISTINCT a.au_id AS "SSN", a.au_lname + ', ' + a.au_fname AS "Full Name"  
FROM authors AS a  
inner join titleauthor AS t  
ON a.au_id = t.au_id  
WHERE t.royaltyper < 50  
ORDER BY a.au_lname + ', ' + a.au_fname
```

Below the query window, the 'Results' tab is active, displaying a table with two columns: 'SSN' and 'Full Name'. The table contains six rows of data.

	SSN	Full Name
1	213-46-8915	Green, Marjorie
2	472-27-2349	Ginglesby, Burt
3	724-80-9391	MacFeather, Stearns
4	267-41-2394	O'Leary, Michael
5	899-46-2035	Ringer, Anne
6	672-71-3249	Yokomoto, Akiko
